

GRAND CENTRAL TOWERS

PHILLIP, ACT

- Landscape Architectural Design
- Resort Style Poolside Planting Design
- Public Open Space Design
- Access & Mobility
- Multi Level Planting Design

Grand Central Towers is a 25-storey duo of residential towers; an architectural statement inspired by the transit at its doorstep and a full complement of modern conveniences.

SPACELAB was responsible for running with the project in the midst of DA amendment and was required to translate initial designs by others into cohesive, functional and buildable landscapes characterised by:

- Ground level – high quality paving, a generous supply of bike racks and shaded seats under canopy trees;
- Level-5 up to level-16 – tiered plunge pool and BBQ areas with ample tables, benches, and rooftop nooks amongst canopy trees, including a reflection pool water feature.
- All Upper Floors - Sculptural planter boxes are complemented by art deco style trellis screens which create rooms for semi-private experiences within the greater landscape.

SPACELAB was engaged in 2019 to take the project through construction and close out handover of the design and assets.
