

KAMBAH VILLAGE UPGRADE

KAMBAH, ACT

- Landscape Architecture
- Placemaking
- Strategic Planning
- Urban Planning

SPACELAB was initially engaged for a small refurbishment of the internal courtyard of the centre, this then grew to the upgrade of the entire eastern section of the space.

SPACELAB worked in collaboration with GHD who provided engineering services for the site and with the ACT Government's internal design team. The result was a design that paid homage to elements of the original design of the centre's landscape, with a modern outlook.

The space now incorporates more tree and shrub planting, additional carparking with a shared zone, new play equipment and general recreation space adjacent to the shops. New facilities such as a redesigned toilet block, shade sails and picnic areas add to the amenity of the space.
