

# FORDE DOG PARK

FORDE, ACT

- Urban Design
- Concept Design
- Detailed Design
- Placemaking
- Open Space

Forde is a residential estate located north of Canberra in the Gungahlin area. The Forde Dog Park was a component of the Open Space Works which our team was engaged to consult on. Our team were responsible for the concept design, documentation and detailed design. Consideration for the safety of dogs and their owners and careful attention to ecology and conservation was paramount.

Our team are proud to have contributed to this wonderful space that locals and visitors can enjoy. Successful completion of this project involved a clear theme and aesthetic applied throughout using an orange colour, contrasting against the dominant greens and browns or the remnant Eucalypts. We designed bold signage elements that not only define the space but also provide a sculptural element in the landscape and incorporated bubblers, drinking bowls for dogs and seating amenity within the park. All equipment was custom designed by **SPACELAB**.
