SPACELAB's brief was to design a multi-level landscape with a series of outdoor rooms and high quality sculptural elements. The materiality of the development includes exposed timber, charcoal paving, mixed planting, and water features. The central podium landscape provides recreational and visual amenity for residents in the surrounding units and the units above.

The result is a funky, resort style multi-unit development incorporating extensive landscape amenities. These include a lap pool, plunge pool, outdoor entertaining areas, a gym, and an extensive landscaped outdoor space.

The landscape on Level 5 surrounds the gym and features a water feature, seating and a pergola facing Lake Tuggeranong and Mount Taylor.
