

BROOKLYN

TURNER ACT

- Landscape Architecture
- 3D Modelling
- Custom Design of Facade Elements
- Custom Design of Planter Boxes & Shelter

SPACELAB were engaged to review the facade and to design all of the landscape and rooftop terrace.

The contemporary design mixes dense landscaping with large existing trees to create striking views from all angles on this corner site.

The fourth storey roof-top terrace enjoys an outlook towards Black Mountain, private screen-planting in planter boxes around seating, and a formal, custom designed shelter.

The lush plantings play off the concrete facade allowing the finished product to shine.

Successful completion of this project involved:

- Designing to respond to the street frontage, views and access requirements.
- Developing a sophisticated planting palette that complemented the architecture.
- Utilising creative responses to enable planting, seating and shelters on a rooftop terrace.
- Considering the requirements of residents to maximise amenity opportunities.
- Creating landscape approaches to take visitors from the urban realm to the sanctuary of the communal courtyard areas.
