Jamie earned his Bachelor of the Built Environment (Architecture) from the University of Canberra where he also studied landscape design. Jamie honed his skills in urban design, built form and landscape design, with a heavy influence of Scandinavian green design and Copenhagen urban landscape. He plans to finish his Bachelor of Landscape Architecture before pursuing a further Master's degree.

Jamie joined SPACELAB as Graduate Town Planner in 2023 and has quickly progressed to Urban Planner with an innate understanding of the Territory Plan 2023. He has also demonstrated an ability to navigate the intricate workings of the National Capital Plan, ACAT and ACT planning systems, often finding creative ways to lane split the traffic of government departments. Jamie has taken the lead on projects in and around Canberra and has played a key role in major subdivision, precinct and urban design projects. He has in depth knowledge of the design guides and design response process for DA submissions, with a working understanding of the proposed future missing middle reforms.

With a passion for shaping communities, Jamie aspires to stand at the forefront of urban design and town planning, envisioning a future where cities are not merely collections of buildings and roads but vibrant hubs of culture, innovation, and connectivity. Armed with a blend of creativity, analytical prowess, and a deep understanding of what it means to be Canberran, Jamie is dedicated to crafting sustainable, inclusive, and thriving environments in the Capital for generations to come.

Outside of his professional endeavours, Jamie is a football coach in the local premier league and holds multiple diplomas in coaching. He is also on the board of a local sports club using his project management skills to give back to the community. He enjoys hiking, running, and biking around the Canberra region and playing football on the weekends.
